

System requirements

Windows 95/98/NT4.0/2000/XP/Vista/7® Operating System
Unused USB Port

Non-liability

The company Mostec AG developed and tested the software Mpro with largest care. Mostec is not responsible for any damages whatsoever, including loss of information, interruption of business, personal injury and/or any damage or consequential damage without limitation, incurred before, during or after the use of our products.

General references

Close all open programs, before beginning the installation. For installation under Windows NT/2000/XP/Vista/7®, administrator rights are necessary. The newest software may be downloaded free of charge at www.mostec.ch. Mostec also supplies the program on CD-ROM.

Mpro installation

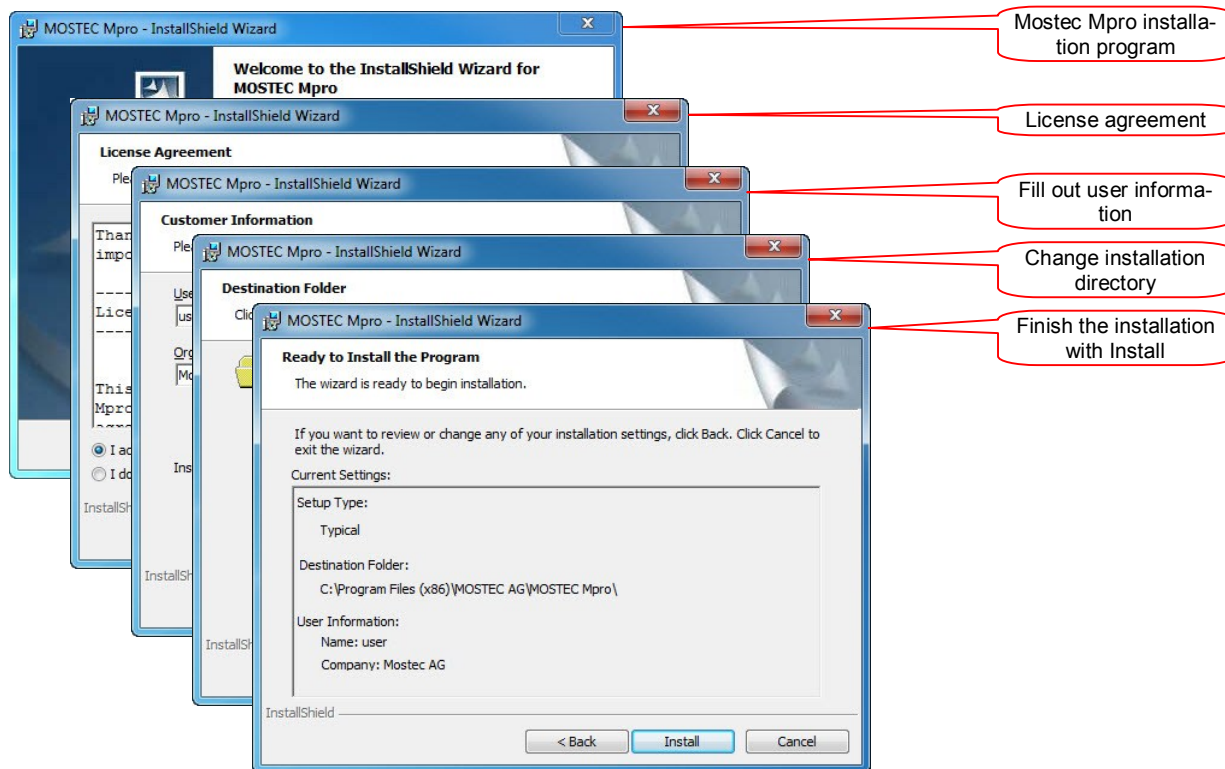

1. Installation with CD-ROM
Put the CD-ROM in the CD-ROM drive, Mpro-Setup starts automatically; otherwise Setup_Mpro.exe must be started manually in the main directory of the CD-ROM drive.

Installation without CD-ROM

The newest software may be downloaded any time and free of charge at www.mostec.ch.

Start the file Setup_Mpro.exe.

2. The installation is now implemented.
The user will be guided by the menus, until the installation is finished.

3. A Mpro Icon will be installed on the desktop to start the program Mpro, or via "Start → Program Files → MOSTEC AG → Mpro".

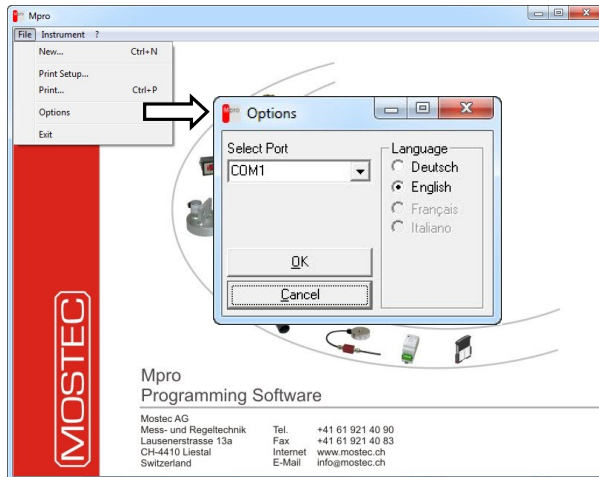

Mpro uninstall

1. Mpro can be uninstalled at "Start → Program Files → MOSTEC AG → Mpro → Uninstall Mpro".

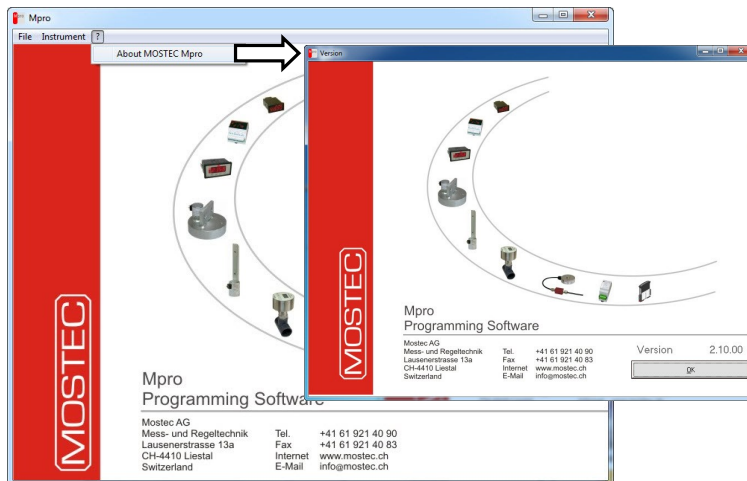

Mpro configuration

1. Set the COM Port and language in the menu **File → Options**.

Note: If you use a Mostec USB programming adapter, the new COM Port can be set in Mpro, after software installation of the USB Adapter. For more information consult manual of the Mostec USB programming adapter on the CD-ROM or at www.mostec.ch.

2. Click menu **? → About MOSTEC Mpro** to see the installed program version.

3. Programming of Mostec devices can be set in the menu **Instrument**. See manual of the current devices for detail information.
